

Take control of your energy costs

Renewable energy solutions to suit all commercial and domestic needs. Our systems are designed to provide a cleaner, greener future.

Our services

Survey & Design

- Desk based assessment
- Technical site survey
- Energy usage & demand analysis
- System & structural design

Consent & Notification

- DNO liaison
- Grid connection application
- Planning permission
- Permitted development certificate

Installation

- Solar mounting installation
- Electrical commissioning
- System and performance testing
- Electrical certification

Monitoring & Maintenance

- Remote system monitoring
- Remote metering services
- Aftercare and maintenance
- Technical system support

If you'd like to find out how solar can benefit your business, get in touch today for a free, no-obligation desk based assessment.

Benefits of Solar PV

Financial

Installation of Solar PV will provide a reduction in your energy bills. In addition, any excess generation can be exported to the grid to provide an additional revenue.

Environmental

Solar PV harnesses the sun's power to produce clean, green energy. The system will reduce reliance on fossil fuels and reduce your company's carbon emissions.

Grid Self-Sufficiency

In generating your own power, you can take control of your energy needs and significantly reduce your reliance on grid-sourced power.
